Dyspepsia

✓ Besides these common symptoms,
which are of a local nature, it is some-
times ~~attended~~ affects the whole system
in which case it is attended with tooth
ache, decay of teeth, pains in the head,
back, & calves of the legs, cold feet - a
liability to take cold - transient symp-
toms of Diabetes - ^{irregular & intermittent} pulse,
low spirits, and a
^{propensity} ~~liability~~ visitability of humors.

Dyspepsia

more or less of
This disease is known by the following symptoms:
"a knowing or greedy ~~feeling~~ ^{feeling} in the
stomach; ~~loss of appetite~~ ^{loss of appetite}, Nausea, vomiting,
and oppression ~~very~~ especially after eating,
flatulency - sour eructations - pain in the
stomach called by Dr. Cullen Gastralgia - heart
- burn - ^{appetite & digestion -} Costiveness - the water brash, called
by Dr. Cullen Cardialgia puerilis - & occasionally
a desire for ~~food~~ ^{hard} lime - Coals - feathers, &
putrid Aliment". ~~as~~ This appetite for
putrid Aliment is of so voracious a nature,
as to lead the negroes in the West Indies who
are afflicted with it to dig up ^{dead &} putrid ~~dead~~
animals to devour them. A black man
at Bristol in this State was afflicted with it.

✓ The ^{Stomach} ~~Stomach~~ is an important
Organ, and its functions intimately
connected with health & life. Dr. Bourne

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]

calls it one of the feet of the tripod which supports life. The other two feet of this tripod are the heart & brain. The following remarks upon its ⁱⁿ importance, and the animal economy demand notice.

1 Its extreme hardiness. Hence it often resists for years the violence that is done to it by excess in eating & drinking - by long fasting - by unwholesome aliments, & drinks, and by taking both ~~and~~ ^{and} ~~both~~ cold & hot in excess.

2 The stomach sympathizes with nearly every part of the body, ^{particularly} ~~but chiefly~~ with the head - the liver - the ~~liver~~ blood vessels - the nerves - the lymphatics - the skin & the limbs.

3 The stomach sympathizes extensively th w:

Effects on the Stomach & waste of Saliva.
6 excess in the use of Acid drinks & Aliments.

7 Frequent repletion with gross food.
8 Swallowing food without masticating it
sufficiently.

9 Frequent repletion with hot, & cold
watery liquors. They act by overdistending
the Stomach, as well as by their Stimulating
& sedative qualities. I once saw an in-
-curable Dyspepsia & tympany brought
on by nothing but drinking large quanti-
-ties of cold water. The cold water is most
injurious taken before breakfast, or just
before going to bed.

10 The excessive use of Sugar. I once knew
it brought on a Grover by tasting 40, or 50
samples of Sugar in a day. Dr Hoffman re-
-lates a case of this disease from the excessive
Use of Sugar in diet.

* & the black dyspepsia in nearly every case
of liver disease is seen in India, the stomach
discovered more or less disease.

* Mr Gold's case.

* It is when dyspepsia is induced by causes
which thus act upon the whole system that
so many ^{disturbing} ~~disturbing~~ symptoms in every part of
the body are brought on by it.

They often induce ^{it} great pain. Diseases V
8 Gall Stones, according to ~~Dechaden~~ ^{Dechaden} 9 ~~Disturbances~~

All these causes ^{first} predispose to Dyspepsia
by creating the debility from Action or Abstraction
& then induce by their force or Continuation morbid Action.
The Remedies for this disease are #

I palliative, and II Radical.

The I consist of such remedies as are calculated
to relieve the painful & distressing symptoms
of the disease. They are

1 Magnesia ^{chalk} - ~~Chalk~~ - Lime water - also pulverized
calined Oyster Shells & Calamine powder.

2 The fixed Sweet Alkali. These two for Acidity.

3 Common salt. A tea spoonful is a dose.
^{Dissolved in water &}

4 Common salt - rendered Acid with lime
Juice, or the mineral acid. D'ullen's remedy.

5 A few grains of Pepper, or Corns taken
After dinner. Relieft the Cure of Sick head
effected by this remedy.

6 milk. This is very useful in relieving
the heart burn. Thickened milk is

= p: 10 to inquire why they ^{produce} ~~do not~~
~~are~~ Dyspepsia, and not the above diseases.
To this question I answer 1. The systems
in which those diseases appear are not
predisposed to them, ^{while} 2. The Stomach ^{by} fights
~~for~~ ~~there~~ a kind of hereditary disinterest
is ~~from~~ from an innate or acquired debility
is predisposed to ^{that} ~~the~~ disease. ~~The more~~ The
difficulty of curing it, like other insidious
diseases is increased by its not bringing any
of the other systems into sympathy. A
Dyspepsia with round blood vessels - nerves
& muscles ~~also~~ frequently exists for a great
while the most powerful Stomachic medicine.
There is always reason to fear in (go back to A
these cases that Ulcer or Schirrus or ^{p: 9}
palsy has taken place in the Stomach or
pylorus.

best for this purpose. The acid of the
Stomach decomposes the milk, & it is after-
wards blunted by its oily & cheesy parts.
lime water & milk may be mixed together.
& Opium. This affords relief when Dyspepsia
is attended with Spasm, or pain from any
other
form of morbid action. It likewise enables
the Stomach to digest food when taken just
before a meal. Dr. Whist mentions the case
of a Lady who was unable to retain, or
digest her dinner unless she took ʒ 30 of
Lig. Lead: just before she sat down to it. I
~~once took Lead for the same purpose~~ with a physician
who took ʒ ʒ of Opium before he sat down
to breakfast ~~for the same purpose~~ & relieved
him for several months by Lead: ʒ ʒ taken
~~under the same circumstances~~
& a Blister to the pit of the Stomach. This
remedy is highly commended by Dr. Darwin.
ʒ a moderate degree of Compression upon
the Stomach by a ^{or light waistcoat} ligature after every meal.

V a Canine Appetite attends - Sweet
~~and several other remedies to be~~
Oil, It is said to blunt, or Dilute
the ^{morbid} Acrimony of the gastric juice. I
shall presently mention some other remedies
for this symptom. 14 Testing. This is particularly
the disease often comes on with chronic
inflammation; of this the signs not only
heat, and pain in the stomach, but a
full or throbbing pulse furnish satisfactory
proofs. I believe ^{some degree of inflammⁿ} it often exists in this
Disturbing disease, and that we fail in
curing it by not prescribing for this state
of the stomach. I have called it Gastricula,
from its being a diminutive ^{grade} of Gastritis.
In all cases therefore - where

+ useful in Anorexia, or want of Appetite.
It should be continued for a day or more to be
effectual.

11 Friction on the stomach after a meal;
11 A Bladder with water heated to 110, or 120°
applied to the stomach after eating.

12 Charcoal in pills or powder. The use
of this remedy was first suggested by its
efficacy in restoring the Appetite of hogs.
~~Other Carbonated Substances have the~~
~~same effect as~~ Burnt bread, oatmeal, &
Indian Corn have the same effect. 13 When

14 The Radical Remedies for this disease
are should be influenced by the state of the
System. Bitters & Dyspepsia are as much
associated as Bark & an Intermittent, in
this disease, in the minds of many physicians,
but in its extent, or violent state, they,
together with all other stimulants are
harmful. ~~If~~ If the pulse ^{is} full or tense,

the cure should be begun by twice
15 V.S. - I have ~~used~~ used it, in a black

12
servant of Gov^r McLean in the year 1802 in
our hospital with ^{success} ~~advantage~~, and I have
2 points: These ~~prepare~~ reduce the morbid
Action of the stomach, and prepare it for
the stimulants. Ipec: & vil. Alb: should
be preferred.

3 Reges when continued attends. ~~Reges~~
~~these~~ ~~these~~ should be ~~composed of a decoction~~
~~lenient, or acting according to the state of the~~
~~bowels. They sometimes give pain & uneasiness.~~
4, A Diet consisting wholly of milk, or
of vegetables. Dr. Hunter cured a boy by
with only of the worst case of this dis-
- ~~case~~ that perhaps is recorded in the
Annals of medicine. ~~to~~ He began by
giving him a Spoonful at a time every
two or three hours. I have known it
cured in this City by a diet of boiled
Trenips. ^{probably} a great advantage would
arise from giving these two Remedies

+ by constant vomiting. The Aliment
to be ^{retained} ~~retained~~, sh^d not be changed - for
every new article of diet in this state of
the Stomach is a new Offensive stimulus.

✓ In these Dr Fuller adds Bark. I have
generally found it hurtful in Dyspepsia,
perhaps from its astringent qualities.

✓ ^{Bring this in p. 15} ~~But~~ But there are cases in which a
diet the ~~reverse~~ ^{opposite} of what has been men-
tioned is indicated - these cases are where
there is an excess of Appetite and where
the Stomach has lost in a great mea-
-sure lost its ~~ex~~ excitability & is passing
^{tropic or stricture state.}
~~towards what I shall presently call Gao-~~

~~trouble~~ The food here should be salt
meat, salted fish - and other Articles
of Difficult Digestion. These ~~stimulus~~
these Articles ~~stimulus~~ by being long in

by weight & measure. ¹³ They are indicated in ~~un-~~
= Due ~~transibility~~ of irritat^{ion} of the stomach discovered X

After the morbid action is reduced which
we may know by the softness of the pulse,
and the ~~operation~~ less frequent vomiting,
or absence of pain, the Remedies should
be 1 Stimulants. These ~~divide themselves~~
~~into 2 classes into condiments & purgatives~~

are 1 ^{of a} vegetable nature. They divide

themselves into Bitters such as Camomile,
Century-herb, wormwood,
Gentian, Columbo root & Quassia. They

all are best when infused in water & in such
small quantities as to be ~~repeated~~ renewed every

day. They should be given in frequent
& rotation. 2 Aromatic & acid vegetables.

Such as nutmeg, ^{lemony} ~~Camella~~ ^{Alta} ~~ginger~~,
black pepper, Turpentine
& Cedar berries, Orange peel, aniseed &
fennel seed, mustard, horseradish, &

Above all - Garlic. They may be taken
infused in water, wine or spirits.

Open the appetite &
= The Stomach ~~from~~ frequently
exists in it ^a natural & healthy
Action. — The Russian peasants eat their
bread half baked ~~to the~~ in order that it may
~~in that state~~ and the Irish peasants
sometimes eat their potatoes half boiled
or half roasted. Both these kinds of Aliments
in this state are hard of digestion — on w.
account they are preferred where food is
scarce, or where ^{great labor is to be} ~~it is not convenient to~~
~~performed~~. They act by indirectly thinning
~~the food & making it more easily taken in~~ ^{the whole body.} Perhaps
taking those vegetables, or any other in
a half cooked state, might be useful in
Dyspepsia where the disease arises from
~~torpor in the stomach~~ either of
the causes that have been mentioned.

a II Class of Stimulants is derived from
 the ~~inorganic~~ ^{mineral} kingdom. They are
 Elix: vitriol, - ~~the sulphates of Zinc & Copper~~ ^{the sulphates of Zinc & Copper} in small
 doses - and above all, the different prepa-
 -rations of Iron. I have generally preferred
 the ~~Oxid of Iron~~, and as a remedy in
 this state of Dyspepsia, a combination
 of ~~the Oxid of Iron with a vegetable~~ ^{the Oxid of Iron with a vegetable}
~~stimulant~~ ^{stimulant} -
 Columbo root - ^{Camellia alba -} ^{Galamus -} Black pepper & Ginger
 appear to be the most active of the latter
 Class of medicines. From 10 to 20 grs
 of the Iron w ^{the} from 5 to 10 of the Vegetable
 Stimulant are a dose. —

2^d A Diet consisting of solid animal food only.
 Wild fowl, venison & fish should be preferred
 to domestic animals, & mutton & Beef - &
 full grown poultry, to Lamb, Veal, and
 Chickens. They should all be kept until
 they are tender, & should be thoroughly done,

✓ It is common to forbid Butter as an
Article of Aliment in this Disease, but
when not rancid, ~~but~~ not disposed to it
I have never found it hurtful. It may
enable the stomach to retain & Digest
fish. ✓ ^{90th} p: 13 ✓ ~~Even cream has~~
~~been taken with safety~~ ~~cream~~ & Chocolate often
lie easily on the stomach. —

15
before they are eaten. Sometimes salted meat,
& salted fish are well received by the stomach,
when fresh meat & fish are rejected. Oysters
tasted ^{choose} and soft boiled eggs are often digested when
no other food will lie on the stomach.

Broths, ~~tea~~, ^{Coffee} ~~and~~ Gruels and liquid food

Food of all kinds should not be tasted. If
broth be eaten, it should only be ~~in~~ after
~~first tasted & tolerated~~ ^{by first}
being absorbed ~~in~~ bread or biscuit, for

the bread & biscuit should be taken in no other
form. ^{It is improved even by being} ~~It is~~ ^{bread} ~~is~~ ^{crust}
No vegetable should be taken with

the above diet, except potatoes, & these sh^d
be roasted, not boiled. The ~~dainties~~ ^{proper} ~~in this~~
in this disease should never be taken, with
the above Aliment, and that for the following
reasons. 1 It disposes the food to fermentation.
2 It disposes it to rise from the ^{bottom} ~~fundus~~
of the stomach, & thus removes it beyond
the immediate influence of the Gastric Juice.
3 It disposes the food, by thus elevating it to

† To stimulate it by ~~asking~~ proposing
a number of different Aliments to the
patient. It will sometimes suddenly vi-
brate with one of them.

V Appetite is suddenly awakened here not
only by surprise, but by the impression
of unexpected kindness or friendship.

† was ^{experienced} ~~by~~ ^{and his companions} Mr Wilson elegant ~~poetical~~
~~journey to the falls of Niagara~~ in crossing the

Ontario on their way to the falls of Niagara.
It is happily described by ~~tho~~ him in the
two following lines in ^{the elegant little} poem in which

he details his adventures to the falls. gain,

" Soon as the survey steam their nostrils,
" They sicken, heave & stagger down again.
This sickness ^{was} prevented only by their ~~not~~ leaving the
cabin as soon the vessels came upon deck

16

flow through the pylorus into the Duodenum
before the process of digestion is completed.

To ~~increase~~ ^{excite} an Appetite when
weak, or ~~too~~ deficient, the following means
have been found useful. +

2 never to permit a patient to smell the
food he is to eat while it is cooking. Its
effluvia often destroy the Appetite. This +

3 To surprise the Appetite by unexpected
articles of diet. Anticipation often destroys
it.

4 To let but a small quantity ^{of food} at a time before
a patient. ~~Recall the fact of horses~~ ^{Horses} ~~who~~
always eat most hay when it is put into
this ~~it~~ racks in a small quantity at a time.

5 An Article of diet sent unexpectedly by
a neighbour has often been eaten with
pleasure, when a patient rejects every
thing cooked in his own kitchen. The ✓

= and eating upon deck. Cold food should be
preferred in such cases from its emitting no
effluvia.

To enable a patient to retain Aliment
when received into the stomach, the following
practices
~~have~~ have been found useful.

1 never to take ~~more~~ more than a few ounces
at a time, and take it five or six times a
day, instead of but two or three times ⁱⁿ the
the 24 hours, and in the night, as well
as during the day. The stomach ~~should~~ ^{should} is
never be full nor empty. Like an idle
Schoolboy when not employed, its ~~will~~ ^{never}
fails to do mischief in consequence of
the debility induced by the Absence of Stimulus.
- Ans. I have sometimes advised patients
not only to ~~take~~ place food by their beds to eat
in the night, but to carry it from home
with ^{them} ~~it~~ in a tobacco box, ~~or~~ if it be
meat, Ginger bread rolls which are very
useful to prevent flatulency from consti-
-ness may be carried in the pocket.

V A drink prepared of the vitric, or
sulphuric acid Zij ~~best~~ old spirit of any
kind Ziv water Zij made pleasant with
sugar has been found to be very accepta-
ble to the stomach. also Letzer & Goda
waters. Dr Drake ^{of Cincinnati} tells us that he found
well water better received by the stomach
in Dyspepsia than river water. This
former he says contained a solution
of some earthy & metallic tonic in it

2 Food is often retained by taking it only in a lying posture. ~~Breeding~~ mineral waters are often retained at first only in this way. Breeding women seldom sit up, or get till they leave their beds in a morning. Sea sick-ness is mitigated, or prevented by a recumbent posture of the body. Persons who are obliged to take Aliment in this way should not leave their beds for several hours afterwards.

3 But one kind of Aliment should be taken at a time. I gave my reasons for this formerly.

The Drinks in this Disease should be water, port, madira, and Sherry wines. Sometimes Claret & port lie better on the stomach tho' of an acid nature than the white wines, from their containing less fermentible matter in them. ^{The popular drink in this dis.} Brandy & water should be ~~resorted to~~ ^{resorted to} with great caution.

6
†. The Cold Bath. Celsus commands in high fevers pouring cold water upon the head, back & region of the stomach. -

many people have been made lots by drinking
aident spirits in this disease by the advice of
their physicians. It is take care gentlemen
that no such persons charge their deaths,
and all the crimes of their lives upon us

at the day of Judgement ^{with the arms} - with the lungs and
5 gentle exercise ^{especially on horseback.}
Reading aloud is recommended by others in this disease.
Costiveness, and all its exciting causes
especially ^{chag tea - adent spirits - tobacco -} cold & wet feet should be carefully
avoided.

If all the above Remedies fail, a Saliva-
tion should be ~~ad~~ prescribed. I have several
times cured it by this remedy - once pub-
- lished in ~~the name of~~ the name of Prioleau

in the P Hospital in the year 1800. It will be
more necessary if the liver be affected ~~and is often~~
the case. This disease is apt to end in ~~fever~~ ^{ch}
It ends in ~~fever~~ and this 3 in cancer ~~ch~~
Cases in the stomach & pylorus in w:

cases, the patients live & die in great pain.
One of them put an end to the life of Dr
Antony of Rhode Island. ~~He~~ Dr. kept him easy.

✓ a swelling of the feet & legs is always
an alarming symptom in this dis-
-ease. It preceded the death of Dr
Priestley who died of Dyspepsia.

A p^htha or sore mouth is generally
a fatal symptom.

~~His~~ His blood was fiery to the last ~~was~~ day of his life. ✓

~~The Dr. Cullen mentions several different~~
~~from the Dr. Cullen~~ The Dyspnoea from sea sickness is prevented by V.S. or a gentle purge - upon going to sea. It is cured by

1 Laxatives. 2 Opium. 3 Lying up the stomach. 4 Lying with the head below the heels. 5 By eating a little & often especially of gingerbread. 6 by the cold Bath. — 7 by terror. Mrs Warden.

I shall mention the Remedies for Dyspnoea from pregnancy hereafter.

There is a disease ¹⁸⁰⁵ ~~not~~ seated in the stomach the reverse of Dyspnoea called Bulimia, in which the food so far from being not being well received by the stomach, or easily digested, is received with voracity, and digested with

a rapidity that renders a constant supply of Aliment necessary for the relief of the patient from the ~~poor~~ distressing disease of hunger. Patients seldom acquire fat or flesh from all they eat. ~~But~~ I have seen it in its worst form in lean people. The quantity of food they take in a day & that of the gropest kind is from 6, to 12 pounds. In other respects they appear to enjoy good health. The disease appears to be local, and to arise wholly from a ~~derangement~~ ^{alteration} an increase in the dissolving power of the gastric juice from disease. -

The Remedies for it should be Aliments of all kinds - that ^{are} difficult of digestion. - These should be vegetable & animal. ^{Carrots and parsnips,} These ^{former} should be half boiled potatoes - half baked bread - ~~soft~~ or bread made of unbolted meal. ~~Attended~~ with

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]

these should be taken ~~hubb~~ roasted, or
boiled, or run ~~meat~~ - ~~Samouss~~ the fat
of pork - or beef - Sweet oil taken three
or four times a day, - the Chewing of
tobacco, also large doses of the powder of
Oyster shells - or of bircho promise be-
-nefit in this disease. The oil & tobacco
have been employed with success.

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]
